701 Mobilization generally failed during the period of hostilities. The majority of men managed to secure themselves in the "armored institutions" exempt from draft, others went into hiding, and a small number reported for duty. Many men in hiding were killed or wounded and exiled during the *"oblavas"* (manhunts and searches).

702 After the war, classes of 1926-1928 were called up for training. Presently, men born in 1929-1931 are in training. The basic training takes place in Lithuania and East Prussia. The trainees wear their own clothing and provide their own food: each week they are drilled 4 days and then are told to proceed home and bring back food supplies for a week. When training is completed, men are dispatched to Russian bases, some are assigned to the 16th Infantry Division stationed in the homeland.

702 874 There is no officers school for Lithuania specifically. However, in all university and college level schools military training is obligatory for men and women throughout the years of schooling, 4-5 hours weekly. Reserve commissions in respective specialties are given upon graduation—Junior Lieutenantcy to Captaincy, depending on the degree of success in passing the examinations of the Military Chair ("Cathedral"). General Karvelis, a former artillery officer of the Lithuanian Army, heads the military "chair" in the University of Vilnius, assisted by Colonel Purelis. General Vincas Vitkauskas, former commander-in-chief of the Lithuanian Army, heads the military chair in the University of Kaunas. Lectures are given in Russian and Lithuanian, depending on the lecturer's ability to speak Lithuanian and the composition of his class. The lecturing personnel is one-half Russian. Orders are given in Russian.

[872] In secondary schools, military training is likewise compulsory for both boys and girls, beginning with the basic first grade.

War Preparations

712 Klaipėda (Memel) is converted into a major submarine and naval base.

723 During the first half of 1948, regular Soviet Army forces (exclusive of the Navy and MVD-MGB units) stationed in Lithuania numbered about 80,000 men of infantry, artillery, aviation, armored and tank units. The artillery is concentrated along the seacoast.

Airfields are continually expanded to accommodate transport craft but the number of planes shifts—the planes refuel and take off. Nevertheless, some "destroyers" (fighter planes), light bombers, reconnaissance and training planes are permanently stationed. Radar installments are in evidence, but do not seem to be alerted. Three "rocket artillery" airfields were constructed at Lisbergylas-Linksmakalnis in Kaunas, at Vilnius, and in Mažeikiai county in the northwest. Little is known regarding the closely guarded secret weapons of "Toxin Fog" and "Thermite Artillery." Aviation training schools are in operation at Vilnius and Kaunas, but no Lithuanian students are admitted there.

According to Russian officers, Estonia and Karelia form "Zone A of the Strategic Area of the Northern Front," while Latvia, Lithuania and East Prussia form "Zone B, an auxiliary strategic and supply area for the operational area of Poland."

First Law

671 The first law on elementary education was
● 872 passed in 1922 making the Lithuanian primary
875 school of four grades and requiring all children of both sexes between the ages of 7 and 13 to attend it. The general administrative organization was based on the principle of decentralization which granted wide powers to the local authorities and to the children's parents. However, this experience soon showed that under such a system the qualifications of the [647] teachers left much to be desired. For this reason the law of 1922 was amended in 1925 and the appointment of teachers, their transfer from one school to another, and certain other matters were centered in the Ministry of Education. In the same year the school curricula were drawn up and officially approved. The schools were run under this law up to 1936 when a new elementary school law [186] was promulgated which declares that the purpose of the elementary school is to provide primary education for the youth of Lithuania, foster their spiritual and physical growth, and teach them to love, cherish, and sacrifice themselves for Lithuania.

872 The present elementary school has six grades. The first four, obligatory for children between 7 and 13, form the first degree of study. The last two, for children 14 and 15 years old, form the second degree which is optional as yet because not enough schools are available. The increase in them began only in 1933. The elementary school subjects of instruction are: Religion taught by clergymen of the various denominations and compulsory for all children, Lithuanian as the language of instruction, arithmetic, knowledge of environment, history, geography, 872 natural history, art, manual arts, music and 186 singing, and physical training. In an ele- 191 mentary school district where the number of children of non-Lithuanian parentage exceeds

872 186 191 30, a school with a language of instruction other than Lithuanian may be established. In it Lithuanian is taught as a distinct subject from the second grade onwards, and from the third grade on instruction in environment, history, and geography is given in Lithuanian. In a school with Lithuanian as the medium, children of non-Lithuanian parentage, if their number is not less than 20, are taught their mother tongue as a separate subject.

Certificates Granted

872 874 At the end of the first and second degrees of study, the pupils are examined and granted the elementary school graduation certificate which, if from the second degree, grants the right to enter, without further examination, the first grade of a secondary school (gymnasium) or a school offering special training for a vocation. Persons who have attended no schools may earn these certificates by passing official examinations embracing the entire course of study.

875 Elementary school teachers are classified as junior, first-degree, second-degree, senior first-degree, and senior second-degree. They are trained in normal schools and pedagogical institutes. Admission to normal schools is accorded those who have completed four grades of a secondary school, and the course extends for 4 years. To the pedagogical institutes only graduates of normal schools or gymnasia are admitted and the duration of studies is 2 years. Each teacher has in charge from 30 to 60 pupils, the average being 55. The average number with which the teacher works in winter is 43, and in summer 30,

5:Masiliūnas G-4, 5 (no date)1939 RB5 Lithuanians RB5

875 [872] since not all children in Lithuania attend school all the year. First-grade and second-grade pupils in the rural districts go to school only 4 months; September 1 to November 1, and May 1 to July 1. In winter the country schools are attended only by third-, fourth-, fifth-, and sixth-grade pupils. In urban areas pupils attend throughout the school year.

871 The maintenance of elementary schools devolves on the local authorities. The costs of one school and one grade are around 11,890.-23 and 5,519.6 litas respectively. One lita is 16.93 cents in coinage of the United States. According to the figures of 1937, the cost of keeping one child in an elementary school is 99.4 litas annually. Towards the upkeep of elementary schools an average of 11.48 litas was paid by every inhabitant in 1937.

School Buildings

346 871 The school buildings are for the most part erected by the localities, grants-in-aid being made by the Ministry of Education which assigns in its budget over a million litas yearly for this purpose. At present about 80 new school buildings are constructed each year at an expenditure of two million litas. With the additional sums assigned for the acquisition of equipment and educational appliances, about three millions are spent annually.

871 On January 31, 1938, there was a total of 2,599 schools, 5,613 teachers, and 301,188 pupils or approximately 12 percent of the entire population enrolled in elementary schools.

871 873 The secondary school system was reorganized in 1936 by a special law. The 8-year gymnasia, modeled after the former Russian

VII. EDUCATION — GENERAL, AGRICULTURAL AND HOUSECRAFT

872 Compulsory elementary education was gradually introduced between 1928 and 1931.

At present, elementary schools are divided into two grades. The first grade, which consists of four standards, is compulsory for children from 7 to 13 years of age. The second grade, consisting of two standards, is intended for children between the ages of 14 and 15 who have passed through the first grade; attendance is not as yet compulsory.

(In the Klaipėda territory attendance for six years at an elementary school is obligatory.)

To meet the needs of peasants on isolated farms, schools consist, as a rule, of only one or two class-rooms; those in the chief towns have from four to six rooms. The network of schools is organised in such a way that no child ever has to go more than 4 kilometres to get to school.

[875] The teachers are trained at the training colleges and at the Pedagogic Institute. Qualified students of the training colleges may proceed to higher educational establishments (the university). The Pedagogic Institute has a two-years course for students who have completed the grammar school or training college curriculum. The teachers are officials, paid by the State. The municipalities provide them lodging, heating and lighting or a cash equivalent.

The progress in elementary education since before the war is illustrated by the increase in the number of schools and of pupils. In 1913, there were 875 elementary schools in Lithuania, with 51,221 pupils; in 1919, there were 1,036 schools, with 45,540 pupils, and in 1938, 2,319 schools, with 283,773 pupils and 5,110 teachers. During the early years of Lithuanian independence, when the Government set about organising education on lines in keeping with the national aspirations, there was a shortage of qualified teachers and of school-buildings. In 1913, out of the 875 elementary schools in existence in the territory which now constitutes Lithuania, only 360 had their own premises, and some of these buildings were destroyed during the war.

874 Adult education is provided by the people's universities and by evening classes held at the elementary schools.

212 There is a steady decline in the number of illiterate persons in rural districts, and there are practically no illiterate young people.
